

# MINDEASE

## DEVELOPED BY

### STUDENT SUPPORT & CAREER GUIDANCE WEBSITE

Vyshali Senthil

### Static Front-End Documentation

**HTML • CSS • JavaScript •**

## INTRODUCTION

Mind Ease is a front-end web application designed to support students in their academic, emotional, and career journeys. Built with modern web technologies, it offers a responsive and interactive user experience across all devices. The platform provides structured guidance, access to expert resources, and a user-centric layout that promotes clarity and ease of use.

## PROJECT OVERVIEW

Mind Ease focuses on delivering educational and emotional support to students through a well-organized, responsive website. It includes a variety of sections covering career guidance, wellbeing, time management, expert mentorship, and more. The project is built using HTML, CSS, Bootstrap, and JavaScript, with animations and interactions to keep users engaged. The design emphasizes accessibility, clean structure, and future scalability.

## TOOLS USED

- **HTML5** – Semantic structure and page layout
- **CSS3** – Styling, Flexbox, and responsive design
- **Bootstrap 5** – Responsive grid system and UI components
- **JavaScript** – Interactive features and DOM manipulation
- **VS Code** – Code editing and file management

### External Libraries:

- **Owl Carousel** – For sliders and testimonials
- **WOW.js** – Scroll animations
- **Waypoints** – Triggering effects on scroll
- **Easing.js** – Smooth animations

## KEY FEATURES

- Fully responsive design using Bootstrap grid and utilities
- Hero section with headline messaging
- Smooth scroll animations for dynamic flow

- Carousel for testimonials and blog highlights
- Modal image previews in services section
- Scroll-triggered animations using WOW.js
- Blog section with animated Bootstrap cards
- Static but styled login and registration forms
- Contact form with modern layout and field grouping
- Footer with newsletter field and navigation links

## PAGE STRUCTURE

- Homepage with hero section and responsive navigation
- Services section with feature highlights and modals
- Testimonials displayed in a carousel
- About Us page with mission and team info
- Blog page with article previews and dates
- Contact page with static form and contact details
- Login and Registration pages with styled inputs
- Footer with legal links, company info, and subscription form

## CONCLUSION

Mind Ease is a complete front-end website built with modern web technologies to deliver a helpful, accessible, and interactive experience for students. Its clean layout, responsive structure, and functional components make it a solid foundation for educational and career support systems. The website is scalable and can be extended with backend integration in the future.
